About Author

German-born author,
Ezra Kyrill Erker unveils his edgy new novel
and discusses Japan's post-millennial cultural
and societal shifts.

In post-millennial Japan an innocent faith in the collective good, in continuity, is being replaced by cynicism, sexual curiosity and a crumbling of social foundations. For a group of high school students and their teachers, for Sayaka, battling illness, and Koji, struggling through loss, it is a test of tragedies threatening to derail the future – as rage, humour, eroticism and hope interweave to tell a story of modern Japan in whose reflections we see ourselves.

Meanwhile, we have continued buying Thai-language rights from foreign titles to serve domestic demand. Songs of the jailbirds

**From life inside a Bangkok women's prison
to working as a prostitute with yakuza,
author Thanadda Swangduen
is winning awards for telling her story**

Thanadda Swangduen's latest book *Khang Ying* reveals the astonishing life behind bars of women inmates. "Prisons create communities of their own," said the 47-year-old sex worker-turned-author, who spent 1,150 days in a Bangkok jail two decades ago on a drug conviction. "The inmates set their own rules and we had to adapt to carry on with our lives. Prison is a living hell where hundreds of convicted and had to serve jail for the sins others committed." Thanadda's book, the title of which translates as "women inmates", shows how prison changes women, and not necessarily for the better. Some were turned from fragile young women into aggressive and violent inmates. One alpha inmate was a gentle mother before becoming a tough lesbian with cropped hair after years in jail.

"Tom, lesbian or whatever, it does not matter. They had to adjust to survive," she shrugged. Ironically, the unbearable situation in prison has given Thanadda a second chance by prompting her to start writing.

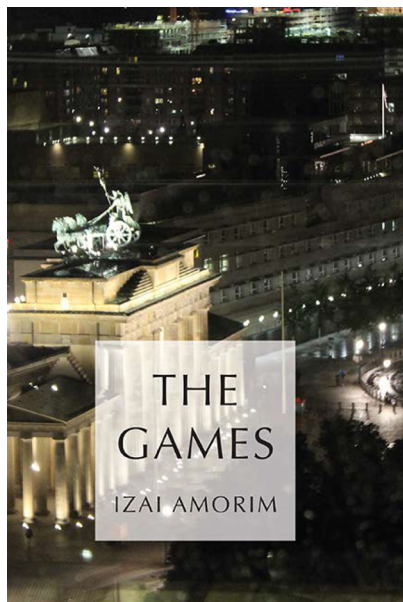

A high school dropout, Thanadda does not like reading books. Her latest career has its roots in writing appeals for other inmates. "I learned how to write good sentences to convey emotion." She bragged, "Eighty percent of the appeals that I wrote for my friends succeeded and they received leniency later."

Cr: <http://www.bangkokpost.com/news/special-reports/1088765/songs-of-the-jailbirds>.

New York City, early 1990s: a young, rich, and well-educated Central American man on the run from the police and Colombian drug dealers. He is accused of crimes he didn't commit. Ready to do what it takes to survive, Pablo ironically embraces the very drug trade that threatened his life in the first place. Who is he? What is he really capable of? The question of identity is at the heart of *On the Run*. More than a contemporary story of survival, it's a journey of self-discovery. Pablo's voice is funny, sometimes mean and merciless. He moves with nightmarish ease from recounting his adventures to recollecting his early life. Not always politically correct, *On the Run* gives you an insightful, twisted, humorous, and often disturbing view of conflicting worlds and beliefs: North and Latin America; black, brown, and white; rich and poor; rational and esoteric – and shows how they mix, match, and clash.

The Games is a humorous but dark, even mean, political thriller. This mother of all conspiracies starts slow but the action accelerates quickly. Good guys don't win in the end because there are none. It's a battle of evil against evil involving environmental protection organizations operating extortion rackets; terrorism without a cause; secret services running amok; global television networks manipulating the news; politicians and profiteers hijacking major international sport events; etc. More than just humor and action in an international setting, this thriller exposes a dark side of our information age and reveals a serious political threat to our democracies: conspiracies to use information, communication, and storytelling to establish power structures not accountable to anyone. Power without accountability undermines the principle of representative government by the people and for the people. Therefore, the relevant question in *The Games* is not "who did it and why" but "what if these things come to pass."

Title The Games
Author Izai Amorim
ISBN 978-1493711567
Extent 353 pp

Synopsis:

It's January 2013 and the Frenchman Claude Tegel, the first president of the just-five-yearold United States of Europe, wants to get reelected. He badly needs the German vote, but his German political allies will only support him if he helps bring the 2021 Games to Berlin. Claude will hire Madeleine Orly, the ultimate operator, to organize Berlin's bid. Back in 1994, when Claude was mayor of Paris, Madeleine won the bid to stage the 2001 Games there. Can she pull it off again, twenty years later? Maybe, if she can bring GreenKraut on board. GreenKraut, headquartered in Berlin, is the biggest of the four environmental protection organizations operating in the U.S.E. Its CEO, Dr. Hans von Adelsberg, has one big dream: to build a global empire. But first he must take over all his competitors in the U.S.E. A bloody Green War has just started. Getting involved in the bid could accelerate GreenKraut's victory. Berlin's bid will make one person in particular very unhappy: Graham Gatwick, the owner of Liberty International Broadcasting League Inc., better known as LIBL-TV, based in London, who is backing London's bid. If London wins, he will be a powerful insider, able to influence decisions, especially the one about who gets the exclusive broadcasting rights. And he really wants these rights. LIBL-TV, with an audience of three hundred million English-speaking people worldwide, has a lot of power to make friends and influence people. Mr. Gatwick will use this power to convince the world that London is the best choice for the 2021 Games. LIBL-TV will start a smear campaign to discredit Berlin. This campaign will be a gift from heaven for Eliza Heathrow, a young American journalist living in Berlin. A plumber will help her – without her knowledge – to obtain the damaging information LIBL-TV needs. Eliza will be hired by LIBL-TV and

will start reporting from “Berlin, the War Zone.” Eliza will never know it, but this plumber is a plumber only in the figurative sense of the word, since he “fixes things that are broke” and “stops leaks.” He will use Eliza and quite a few other people in his plan to sabotage Berlin’s bid. The only person with absolutely no interest in the Games is Rainer-Werner Sprengberg, a former terrorist now on parole after twenty-five years behind bars. In his prime years, in the nineteen-seventies and eighties, Rainer-Werner Sprengberg was the most dangerous, the most efficient, and the most hunted terrorist in Europe. Now he is an analog person lost in a brave new digital world. A loner, he spends his days walking around Berlin and photographing lace curtains. Rainer-Werner’s analog ways will attract Marianne Wissensberg, a young historian researching twenty-first-century terrorism. She needs his help to create a fake terrorist group for the sole purpose of studying people’s reactions. Anti-terrorism agencies are not prepared to deal with old-fashioned guys like him anymore. Rainer-Werner will fall for Marianne’s seduction games and together they will set up the Atomic Outcasts. The city of Berlin will be threatened with total destruction by atomic explosion if it doesn’t drop its bid for the Games. Someone else will create a terrorist group: Ismail Kahnahkah, a third-generation Turk demanding civil rights for all “foreigners” living in Berlin. Being a member of the GermanTurkish mafia, he has all the manpower and the firepower he needs. The only thing missing: a few tips from Rainer-Werner. After all, Rainer-Werner has been there, done that... Berlin’s bid will bring together all these people. Each of them knows only a few of the others. They will play games, crossing and double-crossing each other, each of their actions provoking multiple reactions. Things will get out of control, culminating in Berlin’s destruction by atomic explosion on Summer Solstice day, June twenty first, 2013. Who did it and why? Rainer-Werner and his Atomic Outcasts? But what about these secret service agents who keep showing up in the story? And what about the other terrorist groups operating in Berlin? What about Ismail Kahnahkah? What about GreenKraut? What about LIBL-TV? What about... Welcome to The Games! And please don’t forget to place your bets!

Title	Embers
Author	Ezra Kyrill Erker
Publisher	Praphansarn Publishing Co.,Ltd.
ISBN	978-616-510-663-4
Extent	384 pp

Synopsis:

Embers centers on a private high school in central Japan and covers a school year, from spring blossoms to the winter fire festival, following the tribulations of pupils as they grow into adulthood. The collective growing pains mirror the maturation of the country, a transformation as pronounced as what the West experienced in the late '60s and early '70s. In 2006 an innocent faith in the collective good, in progress, is being replaced by cynicism about authority, sexual curiosity and a crumbling of social foundations. For the small group of graduating classmates and their teachers, it is a painful but hopeful process, through an absorbing storyline tinged with humour, tragedy, love and eroticism.

Sayaka is diagnosed with acute myeloid leukaemia. Chika survives a suicide attempt but not the personal struggles that spurred it. Moniwa Koji, an English teacher, is broken by the end of his affair with a married woman. The second years Miho and Yukako experience a sexual awakening with consequences. Barry, a Canadian assistant teacher, in inheriting greater responsibility in the classroom grows into his role and his evolution in Japan. A platonic love develops between Moniwa and Sayaka.

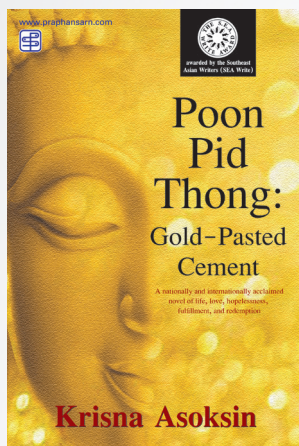

The novel's twelve chapters each contain an episode from Moniwa's own high school exchange year in Melbourne, which loosely mirrors a difficulty in the present.

Sayaka's condition improves under a new treatment regimen and Moniwa's romantic interest, to survive months longer than doctors had given her. Her struggle for life becomes an inspiration for the awkward, bullied Chika, and her

death before the end of the school year is also tinged with hope in the beauty of continuity.

The title refers to the ‘embers of innocence’ of the book’s final line and has multiple connotations. Some students lose their sexual innocence, Moniwa his emotional naivety, Sister Takeishi prevaricates on the innocence of faith, while Japan itself is in an intermediary era when cultural and societal innocence is slowly embering, on the cusp of resurgence or dimming to ash.

Although the 105,000-word novel is rooted in a strong sense of place and time and is movingly personal – describing a non-idealized Japan that actually exists – the evocations are disturbing but familiar. Unlike formulaic, stereotypical Western takes on the country, *Embers* is written from a Japanese point of view. Sadness, rage, humour, sex and other facets of the human condition interweave to tell a story of Japan in whose reflections we see ourselves.

Since she won Chommanard Book Prize in 2010, Thanadda Sawangduen becomes one of Thailand's most renowned authors. She delivers her fourth title "Dark Road in Bahrain Narrated by Eri", which aims to disclose her friend's experience as a prostitute in Bahrain society. As Bahrain has strict laws and regulations, those convicted of serious crimes, drugs, human trafficking and prostitution must be sentenced and receive deportation. In Bahrain, prostitution is both legally and ethically wrong. As prostitution is condemned and forbidden in the Arab world, many prostitutes experience abuse, threat of violence or become victim of sexual molestation to death. Therefore, if they make a decision to pursue this career in Bahrain, they must learn how to survive and deal with unexpected problems that may arise frequently.

This book is based on the author's friend "Nook." She traveled to Bahrain to chase her dream in order to support her younger sisters, her old mother to fulfill and her own dream: to have a house. She ended up being a prostitute and used her body in exchange of money. "You cannot judge people from their appearance. Someone comes with horrible look but turns to offer assistance unlike many well-educated people who mostly turn to be ungenerous people. They are not what they seem to be", says Nook.

This book is to teach us to understand other people, their reasons for action, and remind us not to judge the book by its cover.
